SEBO *automatic* X-SERIES

RELIABILITY IS STANDARD™

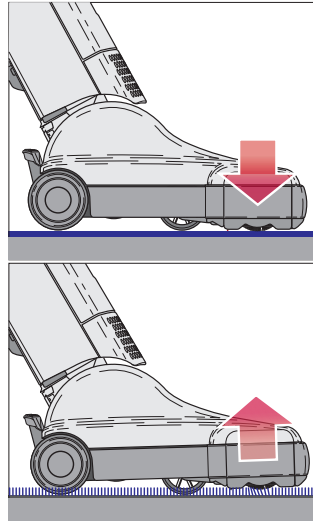
STRONG, VERSATILE AND INTELLIGENT

SEBO *automatic* X

RESPECTED WORLDWIDE

Professional users worldwide prefer SEBO, with good reason! Our success is due to our innovative products and our strong focus on quality. Modern technology, state-of-the-art design and consistent customer focus are found in all SEBO products. Try a SEBO *automatic* X upright vacuum cleaner and you will be impressed by its outstanding cleaning power, first-class filtering system, and of course, ease of use.

The Entire Machine is User Friendly

The *automatic* X has an ergonomic hand grip, convenient carrying handle, and a 40-foot cord.


Automatic Height Adjustment: From Hard Floor to Carpet

The *automatic* X vacuum cleaner is the most technically advanced upright vacuum cleaner in the world. Its ability to monitor the resistance of the brush roller against the floor allows it to raise or lower the power head automatically to the proper cleaning height. This guarantees optimal cleaning performance on all types of carpet and flooring and protects the floor from damage.

Thorough Cleaning at your Finger Tips

The instant-use active wand and flexible hose have an 8-foot reach for effective cleaning.

Flat-to-the-Floor Profile

The 5.5-inch flat profile makes cleaning under furniture and beds easy and convenient.

Sealing Strip

The sealing strip on the bottom of the machine stops the kickback of dirt and channels the airflow through the remaining three sides, increasing the cleaning performance.

On-Board Tools

Three on-board tools are included: The upholstery nozzle, natural bristled dusting brush, and crevice tool.

Changing the Filter Bag is Simple and Clean

When the three-layer filter bag is sealed, no dust can escape.

REMOVES PET HAIR:

The *automatic* X vacuum cleaner is designed to give you optimal deep-cleaning performance and easily removes pet hair. Additional built-in standard features such as easy clog and brush removal, washable brush rollers and quiet operation make every SEBO pet friendly.

SEBO *automatic* X

INTELLIGENT DESIGN

The Electronic Control is the Brain of the *automatic* X

Not only does it control the automatic height adjustment, it is equipped with warning systems and automatic shut-off capabilities that are designed to alert the user to machine problems such as clogs, full bag, and brush obstructions.

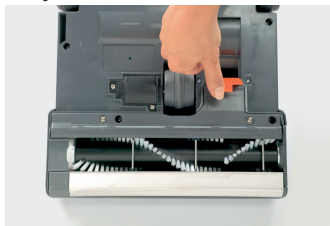
Automatic Shut-Off for Clogs

When the machine senses a clog, it will automatically shut down to protect the motor.

Brush Roller Obstructions are Easy to Remove

With no belts on the brush roller, objects are easy to pull out without having to remove the brush.

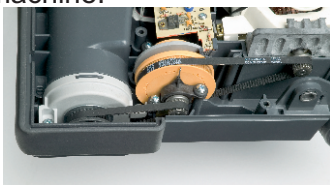
Easy Maintenance

The clog removal door is easy to access.


Easy Brush Care

Removal and maintenance of the brush roller requires no tools!

Lifetime Belt Guarantee

The reinforced toothed belt on the *automatic* X vacuums will not slip or stretch. This results in a more efficient use of power, and the belt should last the life of the machine.


Optional Attachments

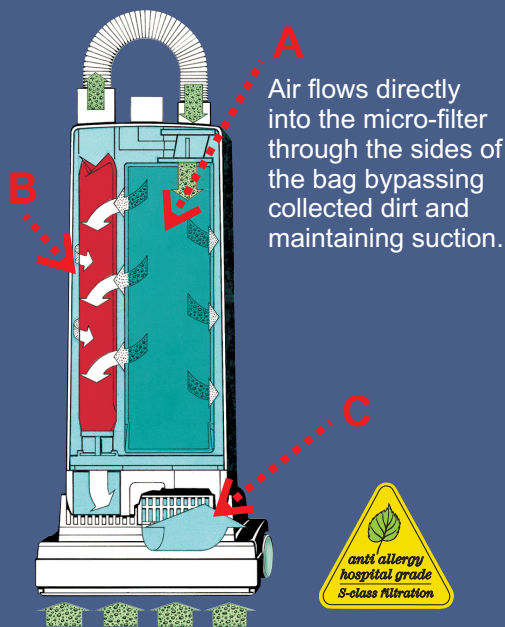
Parquet Nozzle
For cleaning all hard surface floors.

Turbo Brush
For stairs and upholstery. Air-driven rotating brush for small or awkward areas.

Extension Hose
When connected to the machine hose, your reach extends to approximately 15-feet.

Extension Tube
Can be fitted to the active wand for extended reach to areas that are higher off the floor. It is perfect for reaching corners and ceiling fan blades.

Charcoal Filter
Combines S-class filtration with activated charcoal for odour control.

Radiator Brush
For cleaning narrow spaces. Attaches to the crevice nozzle.


SEBO *automatic* X

FILTRATION

The 3-Step Hospital-Grade Filtration System:

A.) The three-layer, full-size filter bag collects the vast majority of the debris.

B.) Any remaining particles are collected by the hospital-grade micro-filter.

C.) The micro-exhaust filter cleans the exhaust air that the vacuum emits.

The S-class filtration system, as described above, results in 99.9% effectiveness to 0.3 microns*, making the *automatic* X vacuums the perfect choice for those with allergies and asthma.

* Measurement SLG / Chemnitz SEBO uses only fibreglass-free filters.
